

SCRUM TUNE-UP

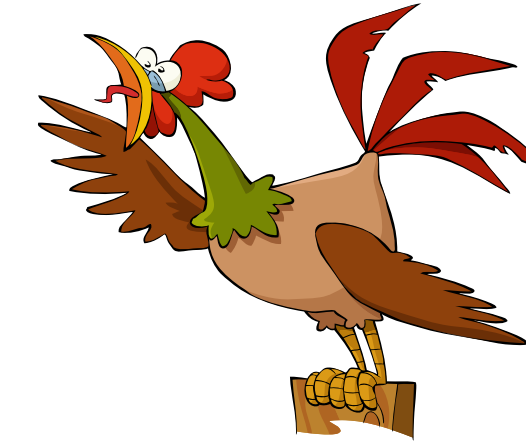

What is working in our use of Scrum?

1

What is not working so well?

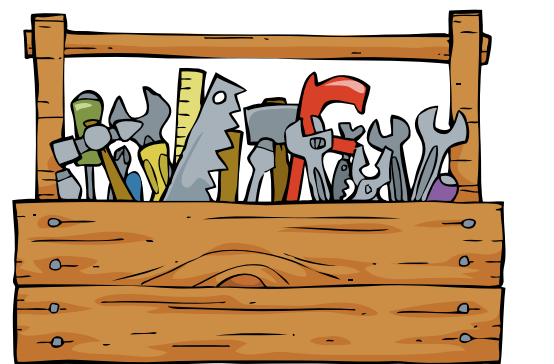

2

People

Do our Development Teams have the skills they need to create an increment?
How can they improve their skills?
What other people/teams might benefit from using Scrum? How can we help them?

3

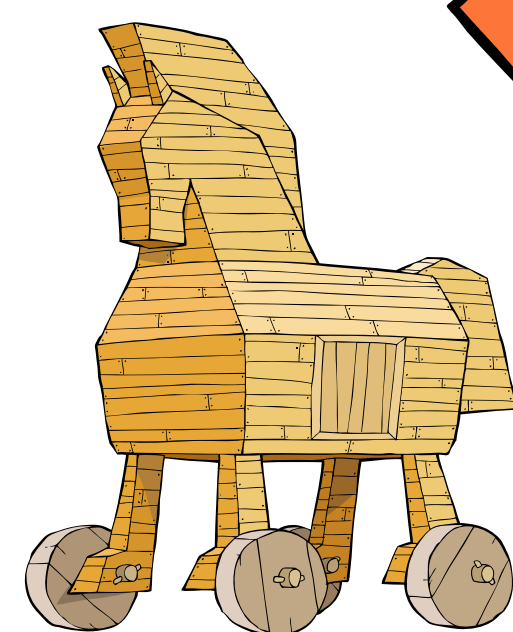

Organization

1. What do we do organizationally which impedes our adoption and use of Scrum?

2. What do we work on first?

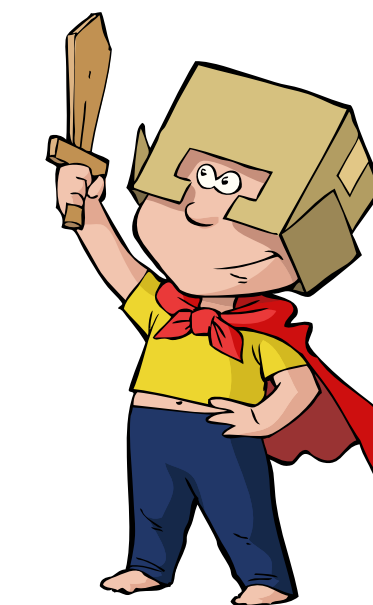

3. Who do we need help from to resolve this impediment?

7

How can we improve our use of Scrum?

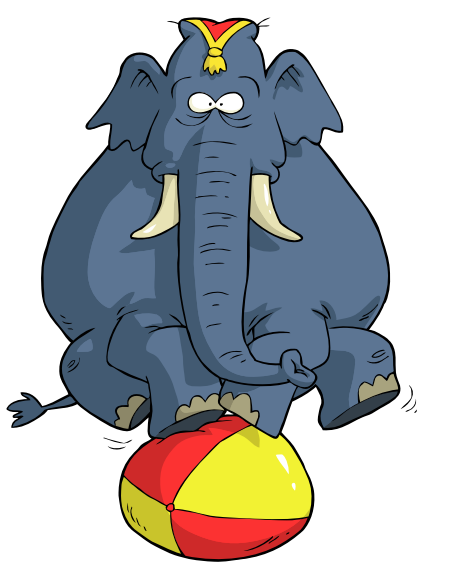

8

Process

How do we bring quality to the forefront?
What can be done to test earlier?
What processes help us get to "Done"?
Which hinder it?

4

Are we hiding or ignoring anything?

6

Tools

How can we improve the definition of "Done"?
What would make our flow of work more transparent?
How do we know and measure that we're delivering value?

5
